### NATIONAL NEGRO HEALTH WEEK

The conservation of health is a question, no doubt, which Kacome face to face with every adult of the race. Yet how few are those among us who are making any langible effort to ward off diseases, so far as habits and home surroundings are concerned.

This matter should be given serious consideration by all classes of people. Strong bodies and strong minds are the most valuable assets a people can have,

An official call has been made by Mr. Emmett Scott, of Tuske gee, asking that, during the week of April 22-28, special attention be given rleaning, painting and heautifying the home and yard. 'In speaking of the general movement, Mr. Scott said, in part:

"In addition to the co-operation of the leading organization among the Colored people, we also shall have the co-operation of the leading white organizations that are working for health improvement in the country, as for example: The National Anti-Tuberculosi Association, The National Child Welfare Association, The Alabama Anti-Tuberculosis Association, The Southern States' Anti-Tuberculo sis Workers, The Metropolitan Life Insurance Company, The Prudential Life Insurance Company, The United States Public Health Service, and the various State and City Health Departments."

The need of continued efforts to improve Negro health condi-tions was especially emphasized at the Tuskegee Workers' Conference, which had for its subject, "Health Improvement for Efficiency.". It was pointed out that ill health among Negroes is caus ing financial losses greater than the combined revenues raised by towns, counties and states throughout the South that education and health improvement will double Negro efficiency; that tuberculosis among Negroes costs the South, annually, enough to establish three thousand five bundred (3,500) factories, which might employ sever hundred thousand (700,000) persons; that contrary to the popular idea, malaria is more common among Negroes than among whites; that in the malaria sections of the South, two Negroes to one white person have malaria each year. It is through such efforts as the National Negro Health Week that it is hoped health conditions among Negroes will he greatly improved,

## THE APRING EXODUS

All through the far South the prediction is made that the spring will see an exodus of Colored people to the North in unprecedented numbers. The outlook is beginning to alarm, not only the southern white, but many thoughtful Colored men are gravely concerned. In some sections Negro business and professional men fear that they will feel the effects. .

Of course, this movement of our people from the South to th North is not an entirely unmixed blessing. There will be local and temporary disadvantages both in the South and the North, but in the final result the benefits to the mee will be so overwhelmingly great as to cause the disadvantages to be lost to sight.

The sentiment is being expressed that the Negro in leaving the

South is quilty of some sort of apostay. Some people seem to feel that he is under a kind of moral or religious obligation to remain in the South. The truth is, the Negro has every reason for leaving the South if he can better his condition by doing so. Germans and Italians and Greeka, and people of nearly every other nationality, have some to this country and foresworn allegiance to their native hade. lands, in order to better their condition; the Negro is only going from one sectoion of his own country to another, but if this movement entailed his foreswearing the South he would be justified in

so doing.

There is absolutely nothing in the mere phrase, "The South is
the best place for the Negro." The best place for the Negro is, as
for any other man, the place where he can do best. The only way
to put any substonee into the phrase is for the southern white people
to make the South the best place for the Negro, or, better, allow him
to do it for himself. to de it for himself.

The conditions that have come about have given the Negro, hi first opportunity to register an effective protest against the treat-ment he has so long endured, and he is showing his common sense and manly sense in seizing the opportunity. The tone of the south-

Ten pees shows that the protest is soing to produce results.

Let the movement zo on! The only danger that could arise would be for Colored people to go North faster than the economic demand there could take them in; but there seems to be no immediate the could take them in the continue of the colored people to the colored takes the c

demand there could take them in; but there seems to be no immediate prospect of that.

It is strange to think how the great war in Europe is working out for the good of the Colored people of the world, and especially for the Colored people of the United States. The race might well join its singing that scod old hymn, "God works fr a mysterious way, His wonders to perform."—New Tork Age.
